MILESTONE AND ACTIVITY LIST

Date	14-Nov-2022
Team ID	PNT2022TMID29508
Project Name	Natural disasters intensity analysis and classification using Artificial Intelligence
Max marks	8 Marks

Mile-Stone

Pre-Requisites	M-01	Prerequisites are the needs required for the implementation of the Various phases of the project. They help to render the relevant Technical information regarding the project.
Project Structure	M-02	The project structure that must be adhered to in order to construct Conversation Engine is as follows.
Data collection	M-03	We are collecting data for building our project. We will be Creating two folders one for training and the other for testing. Images present in the training folder will be used for building the model and the testing images will be used for validating our model
Understanding the data	M-04	Without data, machine learning (ML) is impossible since machines cannot learn. Dataset Digits from 0 to 9 are divided into ten classes in the MNSIT dataset. Every digit is considered as a class.
Model Building	M-05	Importing the model building libraries, Initializing the model, Adding Convolution layers, Adding the Pooling layers, Adding the Flatten layers, Adding Dense layers, Compiling the model, Fit and Save the model.
Application Building	M-06	Building of web application using HTML pages, sever-slide script
Train the model on IBM	M-07	This milestone teaches how to build Deep Learning Model Using the IBM cloud
Ideation Phase	M-08	Preparation of Literature Survey on the selected Project and Information Gathering, empathy map and ideation
Project Design Phase-I	M-09	Prepare Proposed solution , problem-solution fit and Solution Architecture
Project Design Phase-II	M-10	Prepared Customer journey ,functional requirements, Data flow diagram and Technology Architecture

Project Planning Phase	M-11	Milestone list , Activity list and Sprint Delivery Plan
Project Development Phase	M-12	Project Development delivery of Sprint 1, Sprint 2, Sprint 3, Sprint 4
